DATA REQUEST SET M G R A - S C E - 0 0 7

To: MGRA

Prepared by: Thayne K Dye
Job Title: Data Science Advisor

Received Date: 6/17/2025

Response Date: 6/20/2025

Question MGRA-7-5:

How is the variable max_wind_magnitude calculated? Over what period is the maximum determined?

Response to Question MGRA-7-5:

The maximum windspeed recorded over a minute of observation at the ADS observation site is provided as an annual maximum by ADS. The ADS data is filtered to the most recent year after 2018, and then uses the 3 nearest neighbors to each segment to create a distance-weighted average value.
