

**Attestation for Demonstration of Derated Inverter for Purposes of Calculating
Rule 21 Detailed Study Deposit Fee**

Customer Name: _____
Project Name: _____
Project Location: _____

As a representative of _____ ("Manufacturer"),
I hereby attest that the following inverter(s) will have a limited power output or derated as specified
below.

Inverter Manufacturer: _____
Inverter Model Name: _____
Inverter Model Number: _____
Number of Inverters: _____
Individual Inverter Derated Nameplate Power: _____ Aggregate Inverter Derated
Nameplate Power: _____

Method by which derating is achieved:

- Software change via password protection that can only be accessed and performed in the field by authorized Manufacturer's personnel
- Other (describe): _____

I acknowledge that:

1. A secondary label or updated derated label will be installed on or near the updated inverter.
2. For all purposes, the power output of the inverter cannot be changed. Any subsequent inverter power output change(s) is subject to Customer and Southern California Edison Company's (SCE) agreed arrangements that permit the power output change pursuant to SCE's Rule 21.
3. A letter from a Nationally Recognized Testing Laboratory (NRTL) indicating that the inverter can be derated without compromising the certification of the equipment will be needed prior to Permission to Operate (PTO).

I am authorized to make this declaration and sign this attestation as an authorized representative of the Manufacturer.
