Subject: Kern River No. 3 Hydroelectric Project, FERC Project No. 2290-122; Submittal of REC-2 and AES-1 Additional Study Reports and Plan for Continuing Consultation

Dear Secretary Reese:

Southern California Edison Company (SCE) is the owner and operator of the Kern River No. 3 Hydroelectric Project (Project), Federal Energy Regulatory Commission (FERC) Project No. 2290 (Project), located on the North Fork Kern River and on Salmon and Corral Creeks near the town of Kernville in Kern and Tulare Counties, California. With this letter, SCE is filing additional information in the ongoing Integrated Licensing Process (ILP) for the Project, as requested by FERC staff in its Determination on Requests for Study Modification (Determination) issued on February 19, 2025 (FERC Accession No. 20250219-3020).

Specifically, in their Determination, staff recommended modifications to two of the studies included in the ILP study plan, as follows:

- REC-2: Recreation Facilities Use Assessment Study, Camera Study Plan
- AES-1: Aesthetics Flow Study

Attachment A of this letter includes the data and results of the year-long Camera Study as proposed by SCE and recommended by FERC staff in their February 19, 2025 Determination. Attachment B of this letter includes photograph documentation of additional low flow conditions and presented in the AES-1 Aesthetics Flows Study Addendum, which also was recommended by staff in their Determination.

Update and Plan for Continued Consultation with Relicensing Participants

Since the filing of the Final License Application (FLA) in November 2024, SCE has engaged in focused discussions with resource agencies regarding SCE's proposed protection, mitigation, and enhancement (PM&E) measures, which include eight resource management plans and three resource measures (see Appendix E.1 of the FLA; FERC Accession No. 20241122-5253). In addition, in its study plan for the REC-2 Camera Study Addendum, SCE committed to consult with agencies and relicensing participants on the results of the year-long camera study.

SCE recognizes that, with today's submittal of the results of the staff-recommended study modifications, the study phase of the ongoing ILP has come to a close, and that the next step in the relicensing process is FERC's public notice that the FLA is ready for environmental analysis

2244 Walnut Grove Avenue
Rosemead, CA 91770
626.302.9741
wayne.allen@sce.com

(REA). However, productive dialogue with relicensing participants on PM&E measures is ongoing, and SCE still needs to engage relicensing participants on the results of the REC-2 camera study addendum. For these reasons—which could result in proposed modifications to SCE’s proposed PM&E measures under the FLA—SCE respectfully requests FERC to delay its issuance of the REA notice for 90 days, to allow the ongoing and upcoming dialog to continue. This approach would extend an opportunity to potentially resolve critical issues *before* the REA notice is issued, and thereby avoid contested and adversarial proceedings, including the associated procedural delays, administrative burdens, and costs that result.

SCE appreciates FERC’s consideration of this request. If, within this 90-day period, circumstances change and SCE and relicensing participants are no longer making progress towards resolution on key PM&E measures, SCE will immediately inform FERC, so that FERC may issue the REA notice and allow the formal relicensing process to continue without further delay.

SCE looks forward to continuing to work with FERC as the relicensing of the Project proceeds. If you have any questions regarding this filing, please feel free to contact Stephanie Fincher-DeMillo, SCE Project Manager, via email at stephanie.fischer@sce.com.

Sincerely,

DocuSigned by:

106CF18A73D445F...

Wayne P. Allen
Principal Manager
