NOTICE OF SOUTHERN CALIFORNIA EDISON COMPANY'S MANDATED RATE CHANGE DUE TO PACIFIC GAS AND ELECTRIC COMPANY'S DCPP 2026 COST RECOVERY APPLICATION APPLICATION (A.25-03-015)

ACRONYMS YOU NEED TO KNOW:

- PG&E:** Pacific Gas and Electric Company
- SCE:** Southern California Edison Company
- SDG&E:** San Diego Gas & Electric Company
- CPUC:** California Public Utilities Commission
- DCPP:** Diablo Canyon Power Plant

WHY AM I RECEIVING THIS NOTICE?

Senate Bill (SB) 846, signed into law in September 2022, provides a path for PG&E to extend DCPP operations beyond the current operating licenses, which are set to expire in 2024 and 2025. As the owners of DCPP, the legislation authorizes PG&E to collect DCPP costs from the customers of other electric utilities in California, including customers of SCE. Under SB 846, SCE must collect the amounts owed by SCE customers with no additional markup.

On March 28, 2025, PG&E filed an application requesting CPUC approval of the forecasted costs of operating DCPD in 2026. PG&E is the only applicant seeking approval from the CPUC. SCE is required by law to collect the amount authorized by the CPUC in response to PG&E's request. SCE is providing this notice of the rate decrease that could result from SCE's required collection of these costs.

The amount due from SCE customers will vary from year to year depending on factors such as the forecasted cost to operate DCPD for that year and the number of customers served by electric utilities in California. Every year that PG&E continues to operate DCPD, PG&E will file an application with the CPUC to request approval of DCPD costs for the upcoming year. The CPUC conditionally authorized new retirement dates of 2029 and 2030¹.

WHY IS THIS RATE INCREASE NECESSARY?

Continued operation of DCPD is necessary to promote statewide grid reliability. PG&E is proposing to collect \$275.630 million over a one-year period beginning January 1, 2026. Under SB 846, SCE customers must contribute 45.3%, or \$124.913 million, of this amount. Because the amount proposed to be collected is lower than the previous year, customers are forecasted to receive a rate decrease.

HOW COULD THIS IMPACT MY ELECTRIC RATES?

If the rate request is approved, the average residential monthly bill in which 500 kWh per month is used, would decrease by approximately \$1.38 or -0.8% per month in 2026.

¹ Decision (D.) 23-12-036, issued in December 2023

HOW DOES THE REST OF THIS PROCESS WORK?

PG&E's application will be assigned to an Administrative Law Judge. SCE may participate in this regulatory proceeding, as a separate party, in order to protect SCE customers' interests. The Administrative Law Judge will issue a proposed decision that may adopt PG&E's application, modify it or deny it. Any CPUC Commissioner may sponsor an alternate decision with a different outcome. The proposed decision, and any alternate decisions, will be discussed and voted upon by the CPUC Commissioners at a public CPUC Voting Meeting. If PG&E's application is approved, the costs of DCPP will be included in the rates paid by SCE customers.
