**Subject: Kaweah Project (FERC Project No. 298)
Application for New License**

Dear Secretary Bose:

In accordance with 18 CFR §5.18, Southern California Edison Company (SCE) hereby files with the Federal Energy Regulatory Commission (FERC or Commission) the enclosed Application for New License (License Application) for the Kaweah Project (Project), FERC Project No. 298.

SCE e-filed the License Application with the Commission and is providing one courtesy copy to its Office of Energy Projects and Office of General Counsel in accordance with instructions issued by the Commission. Consistent with 18 CFR §5.17(d)(1), SCE is also providing an electronic copy of the License Application to the Director of FERC's San Francisco Regional Office.

The Project currently operates under a 30-year license, which was issued on January 31, 1992, and effective on January 1, 1992. The license expires on December 31, 2021. Through submittal of this License Application, SCE is requesting renewal of its license to continue operation and maintenance of the Project with a license term of 50 years (expiring on December 31, 2071).

The License Application is comprised of six volumes, including public, critical energy infrastructure information (CEII), confidential, and privileged information as follows:

- Volume 1 (public information) contains the Initial Statement, and Exhibits A, B, C, D, G, and H.
- Volume 2 (CEII) contains Exhibit F that provides specific engineering and design information that relates to the generation and transmission of electric energy and qualifies as CEII under 18 CFR §388.113. Volume 2 was e-filed with the Commission under the CEII tab and copies contained herein are marked as "Contains CEII – DO NOT RELEASE" in accordance with instructions issued by the Commission. SCE requests that Volume 2 be maintained in a non-public file and withheld from public disclosure in accordance with applicable regulations.
- Volume 3 (public information) contains the Exhibit E and associated Supporting Document A (SD A) that represents the environmental document of the License Application. Key components of the Exhibit E include the no-action alternative (existing Project description); proposed action; affected environment; environmental and cumulative impact analysis;

conclusions and recommendations; finding of no significant impacts; and consultation documentation. Volume 3 consists of five books.

- Volume 4 (privileged information) includes documents from the Exhibit E and SD A that contain information regarding the location(s) of special-status biological resources and qualifies as confidential information. The disclosure of this information could be harmful to these resources. Pursuant to 18 CFR §385.1112, SCE requests confidential treatment of this information. Volume 4 was e-filed with the Commission under the privileged tab and copies contained herein are marked as “Contains Privileged Information – DO NOT RELEASE” in accordance with instructions issued by the Commission.
- Volume 5 (privileged information) includes documents from SD A that contain information regarding sensitive cultural resources and qualifies as confidential information. The disclosure of this information could be harmful to these resources. Pursuant to 36 CFR §800.11(c)(1), the head of a federal agency may withhold from public disclosure any information about the location, character, or ownership of a historic property, or impede the use of a traditional site by practitioners. Volume 5 was e-filed with the Commission under the privileged tab and copies contained herein are marked as “Contains Privileged Information – DO NOT RELEASE” in accordance with instructions issued by the Commission.
- Volume 6 (privileged information) includes SD B which contains the Draft Historic Properties Management Plan (HPMP). The Draft HPMP includes information regarding sensitive cultural resources. The disclosure of this information could be harmful to these resources. Pursuant to 36 CFR §800.11(c)(1), the head of a federal agency may withhold from public disclosure any information about the location, character, or ownership of a historic property, or impede the use of a traditional site by practitioners. Volume 6 was e-filed with the Commission under the privileged tab and copies contained herein are marked as “Contains Privileged Information – DO NOT RELEASE” in accordance with instructions issued by the Commission.

In accordance with 18 CFR §5.18(a)(3) and 18 CFR §385.2010, SCE has made a good faith effort to give notification by certified mail and electronically of the filing of the License Application. In addition, public portions of this filing will be available at the following locations: (1) SCE’s Kaweah Relicensing Website (www.sce.com/kaweah); (2) by appointment at SCE’s Kaweah Hydro Headquarters Office – Carpenter’s Shop, 44511 Sierra Drive, Three Rivers, CA 93271 (to schedule an appointment contact David Moore at david.moore@sce.com or 626-302-9494); and (3) Three Rivers Branch Library, 42052 Eggers Drive, Three Rivers, CA 93271. Volumes 2, 4, 5, and 6 will not be made available to the public because they contain CEII or privileged information. Volumes 2, 4, 5, and 6 will be separately provided to those entities with jurisdiction over those resources.

In accordance with 18 CFR §4.32(b)(6), SCE will publish notice twice of the filing of its License Application, no later than 14 days after the filing date, in the Visalia Times-Delta newspaper and online at www.3Riversnews.com.

SCE looks forward to working with the Commission and other interested parties on the Kaweah Project relicensing. If you have any questions regarding this filing please contact David Moore, SCE Relicensing Project Manager, by phone at (626) 302-9494 or via e-mail at david.moore@sce.com.
