

# Rule 29 Application

<b>Please provide the following information about your Rule 29 project.</b>			
<b>Project Address:</b>		<b>City:</b>	
EV Panel Size & Voltage:	Panel Size:	Voltage:	
EV Main Breaker Rating:	Will the new panel serve any load other than EV?		
Number of ports being installed:		kW of each port:	
Supporting Cabinet Power Level:	Total capacity of current install (kW)?		
Will there be future EV expansion or growth on site?			
<b>If yes:</b>	How many ports will be installed in the future?		
	What is the future capacity (k/W)?		
	What is the timeframe for future EVSE expansion?		
Will there be load management?			
What type of site (workplace, fleet, MUD)?			
Will the charging be publicly accessible, shared, or private?			
Is the site at a garage, a surface parking lot installation			
Will the site primarily serve light, medium, heavy-duty, or off-road EVs, or a mix:			
Is the site located in a disadvantaged community (DAC)?			
Is the site located in a designated under-served community?			
Is the customer at this site participating in another SCE incentive/infrastructure program?			
Vehicle sector			
Utility BTM Program		Name of BTM Program	
Customer received funding for BTM		Source of BTM Funding	
Total BTM Funding Received		Type of Ports Installed	
Maximum Power Level of Each Port Installed (kW)		Type of Automated Load Management Installed	
Automated Load Management Installation Cost		Estimated Avoided Capacity Upgrade Costs from Automatic Load Management
