

## Agricultural and Pumping Interruptible Program (AP-I)

# BOOST YOUR BOTTOM LINE WITH YEAR-ROUND BILL CREDITS.

Enjoy monthly bill credits year round when you participate in our Agricultural and Pumping Interruptible (AP-I) Program.

Southern California Edison's (SCE) AP-I program is available to agricultural and pumping customers currently served under an eligible Agricultural and Pumping Rate Schedule.

To participate customer must have:

- a measured demand of 37kW, or
- at least 50 horsepower of connected load.

### The savings are easy with AP-I.

With AP-I you can receive monthly bill credits for allowing us to temporarily interrupt electric service to your pumping equipment during periods of peak energy demand. Bill credits are applied year round, even when no interruptions occur.

### Service interruptions are limited and automated for ease.

Upon notification from the California Independent System Operator (CAISO) to reduce energy load, we will transmit a signal to a load-control device we have pre-installed on your pumping equipment. This remote-controlled device will automatically turn off the total load served to your pumping equipment for the duration of the interruption or test event.

You may need to perform a manual reset of the main circuit breaker or pump controller after each interruption or test event.

An interruption can occur at any time — seven days a week, 365 days a year. Interruption events are limited to:

- One event per day (six hours)
- 10 events per month
- 180 hours per calendar year

$\frac{\text{Peak Period kWh}}{\text{Peak Period Hours}}$	X	AP-I Factor	=	Monthly AP I Credit
---	---	-------------	---	---------------------

Example of estimated monthly summer savings:

- Total On-Peak Period kWh = 20,000
- Total On-Peak Period Hours = 100
- AP-I Factor (Average Summer On-Peak) = \$19.62

$\frac{20,000 \text{ kWh}}{100 \text{ Hours}}$	X	\$19.62	=	\$3,924
--	---	---------	---	---------

# Agricultural and Pumping Interruptible Program (AP-I)

## Receive courtesy alerts so you can plan ahead.

You may request courtesy alerts to help you plan for an interruption event. Notifications may be sent via phone, email, and/or text by logging into your My Account to set up or update your alert contact preferences.

For added convenience, you may also download our free DR Alerts mobile app to have notifications delivered straight to your smartphone.<sup>2</sup>

Note: Use of any of the above courtesy services is NOT a substitute for installing SCE's AP-I Control Device.

## How to get started.

You may enroll in AP-I at any time.<sup>3</sup> To enroll, you will need to:

- designate the service account for participation,
- submit the AP-I Contract for Interruptible Service for approval,
- provide a suitable location for the installation of SCE's load-control equipment, where it is accessible to us during business hours and/or reasonable hours, for maintenance and repairs; and
- comply with all provisions within 30 days of contract execution.

## Additional program details.

For billing and participation purposes, your location is required to have interval meters capable of recording electricity use in 15-minute intervals.

There is a six-month minimum enrollment requirement if enrolled by April 30 in a given year and a twelve-month minimum enrollment requirement if enrolled after April 30 in a given year.

Changes or cancellations are only available during the annual adjustment windows outlined in the tariff. To view the AP-I Tariff, go to [sce.com/tariffbooks](https://www.sce.com/tariffbooks).

## Prohibited Resources<sup>4</sup>

The California Public Utilities Commission (CPUC) prohibits certain fossil-fueled generation resources to be used for load reduction during Demand Response (DR) events for this program. Prohibited resources include: distributed generation technologies using diesel, natural gas, gasoline, propane, or liquefied petroleum gas, in topping cycle Combined Heat and Power (CHP) or non-CHP configuration.

## Participate in other programs for added savings.

You may also be eligible to participate in other DR programs, such as our Emergency Load Reduction Program (ELRP), to earn additional incentives.

As a participant in AP-I, dual enrollment in ELRP is permitted and provides a second opportunity for you to receive additional savings by reducing your energy usage during non-AP-I events. No special equipment is needed to participate and there are no penalties if you are not able to reduce your energy usage during an event.

For more information about ELRP or our other DR programs, please contact your SCE Account Manager or visit [sce.com/drp](https://www.sce.com/drp).

## ENROLL IN AP-I TODAY!

Visit [sce.com/drp/enroll](https://www.sce.com/drp/enroll).

For assistance, contact your SCE Account Manager directly or our Demand Response Help Desk at **1-866-334-7824**.

<sup>1</sup> This is only an estimate. Your actual savings will be based on your actual usage during the summer on-peak and winter mid-peak periods.

<sup>2</sup> SCE does not guarantee customer receipt of the notification. SCE is not liable for service provider costs associated with event notifications to customer communication devices.

<sup>3</sup> Per direction from the California Public Utilities Commission (CPUC), SCE has placed a megawatt (MW) cap in the AP-I program tariff that may limit enrollment. Contact your SCE Account Manager or the Demand Response Help Desk at 1-866-334-7827 for more details.

<sup>4</sup> Directed by the California Public Utilities Commission (CPUC) in Decision (D.) 16-09-056.

SCE may, at its discretion, remove customers from the AP-I program at any time, if the load-control device is bypassed or tampered with to avoid interruptions. This fact sheet is meant to be an aid to understanding SCE's pricing schedules. It does not replace the CPUC-approved tariffs. Please refer to Rate Schedule AP-I for a complete listing of terms and conditions of service, which can be viewed online at [sce.com/tariffbooks](https://www.sce.com/tariffbooks).
