## SOUTHERN CALIFORNIA EDISON COMPANY

### NOTICE OF APPLICATION FILING TO CHANGE ELECTRIC RATES FOR THE 2017 ENERGY RESOURCE RECOVERY ACCOUNT REVIEW APPLICATION A. 18-03-016

#### **SUMMARY**

On March 29, 2018, Southern California Edison Company (SCE) filed an application with the California Public Utilities Commission (CPUC) for a review of its 2017 operations. This review is limited to only certain aspects of SCE's business. This review will cover a portion of SCE's ability to obtain electricity on behalf of its customers and its ability to produce energy for its customers from utility owned resources. This application requests CPUC approval for a **decrease** in SCE's revenue requirement due to a net over-collection in certain authorized SCE memorandum and/or balancing accounts. This application is commonly referred to as SCE's Energy Resource Recovery Account (ERRA) Review Application.

#### **ABOUT THE PROPOSAL**

This application will review the following 2017 SCE information:

- (1) If the delivery of SCE's electricity, both SCE owned and contracted, complied with CPUC regulations;
- (2) If SCE accurately recorded purchases of power and fuel in its ERRA Balancing Account; and
- (3) If SCE managed its contracts with electricity producers in compliance with CPUC regulations and reasonably operated its own generation resources.

In 2017, two authorized SCE accounts had more funds than necessary to cover costs (over-collected). The accounts are listed below:

- (1) The Project Development Division Memorandum Account. This account tracks costs related to identifying locations for new SCE-owned generation projects and evaluating generation technologies; and
- (2) The Purchase Agreement Administrative Costs Balancing Account. This account tracks the difference between authorized and actual administrative costs for the Demand Response Aggregator Managed Portfolio Program.

In addition, SCE proposes to return to customers SCE’s share of the net proceeds from the federal government for costs incurred by SCE during the 2014-2015 period resulting from the Department of Energy’s (DOE) failure to meet its legal obligation to store used nuclear fuel.

SCE also proposes to return to customers the unspent and uncommitted funds from its 2016-2017 Demand Response (DR) funding period.

Including the amount over-collected in the two accounts discussed above, along with the two proposed refunds, SCE requests a net revenue decrease of \$54.477 million. This decrease will result in a reduction to customers’ rates of approximately \$0.10¢ per kilowatt-hour.

## **RATE IMPACT OF SCE’S APPLICATION**

Compared to revenues as of January 1, 2018, SCE’s ERRA Review application requests a revenue decrease of \$54.477 million, or a 0.4% system average rate decrease beginning in 2018.

**If this application is approved, an average residential electric customer using 550 kilowatt-hours per month could expect to see a decrease of \$0.51 per month, from \$110.90 to \$110.39.** The following table shows current rates compared to the proposed revenue and rate changes by customer group.
