The purpose of the PPH is to accept public comment from customers of SCE regarding the proposed rate increases. Consumer Affairs representatives from SCE will be present at each site to assist with individual customer billing and service concerns. In addition to the PPH listed above, the Commission has also scheduled joint PPH with Southern California Gas Company, which also has a 2012 GRC pending, in two locations where SCE's and the Gas Company's service territories overlap. The purpose of these joint PPHs is to hear from customers regarding the two applications. The locations and times of these joint PPHs are shown below.

Date and Time of Joint PPH

June 8, 2011
2:00 p.m. and 7:00 p.m.

Location of Joint PPH

San Bernardino City Hall Council Chambers
300 North D Street

At the Joint PPH on June 8 and 9, 2011, the Commission's Public Advisor's office will conduct a bill fair from 3:00 p.m. to 6:45 p.m. to assist utility customers with understanding their gas, electric, and telephone bills, on low-income assistance, and other utility-related topics.

SCE'S APPLICATION FILING

Southern California Edison Company (SCE) has filed a General Rate Case (GRC) Application with the California Public Utilities Commission (CPUC) requesting authority to collect base rate (non-fuel) revenues of \$6.247 billion. The proposed application seeks authority to have the rates become effective January 1, 2012. Every three years, SCE is required to file a GRC in which the CPUC sets annual revenue levels. Annual revenue is the total amount of money a utility collects through rates in a given year for specific purposes. Base rate revenues pay for the costs of owning and operating electric distribution and generation facilities (excluding fuel and purchased power).

THE KEY REASONS FOR SCE'S PROPOSED INCREASE

SCE has made this request to continue providing safe and reliable service to its customers. The primary reasons for the requested revenue increase are to connect new customers to the system, electric system infrastructure replacement, and to meet increased costs for Information Technology (IT) systems such as protection from cyber security threats to electric system assets.

WHAT THIS PROPOSED GRC APPLICATION MEANS TO YOU

If the CPUC approves the application, SCE's request would result in a \$828 million, or 7.22 percent, increase over currently authorized total revenues (or a 15.48 percent increase in base rate revenues). SCE's application also proposes estimated base rate revenue increases of \$152 million in 2013 and \$514 million in 2014. These requested rate increases have been reduced by a total of \$145 million below the initial application filed in November 2010, due primarily to implementation of federal tax law changes enacted in December 2010. SCE filed this application last November because the CPUC requires utilities to file a GRC Application approximately one year before the effective date of the proposed rate change.
