

Safety Corner

EMERGENCY PREPAREDNESS

An emergency can happen at any time. You can help your family be prepared for any emergency situation with a safety preparedness plan, some basic supplies, and advance planning. Whether a storm, an earthquake, a fire, or a flood comes our way, preparedness will help everyone cope better and stay safer. For more information and safety tips visit www.sce.com/safety

Our Commitment

We remain committed to working with communities along the project area to reduce, to the extent possible, the impacts of construction and minimize any inconvenience to residents and businesses during construction.

SAN BERNARDINO COUNTY

Construction Update – December 2015

Tehachapi Renewable Transmission Project

PROJECT AT-A-GLANCE

The Tehachapi Project is a series of new and upgraded transmission facilities, spanning approximately 173 miles, to deliver electricity from renewable wind energy generators in Kern County south through Los Angeles County and east to the existing Mira Loma Substation in Ontario, San Bernardino County.

Getting Ready to Go Green: Upcoming/Future Construction Activities (January – March 2016)

Project Update – Southern California Edison (SCE) contractors are continuing construction-related activities along portions of the Tehachapi Renewable Transmission Project (TRTP). Upon completion, the project will provide added capacity to deliver enough power from renewable and other generators to power three million homes, helping enhance electricity reliability in the region and help meet California's renewable energy goals.

Construction Activities – Upgrades to the electrical system during the next three months will include the following:

Chino Hills, Chino, and Ontario

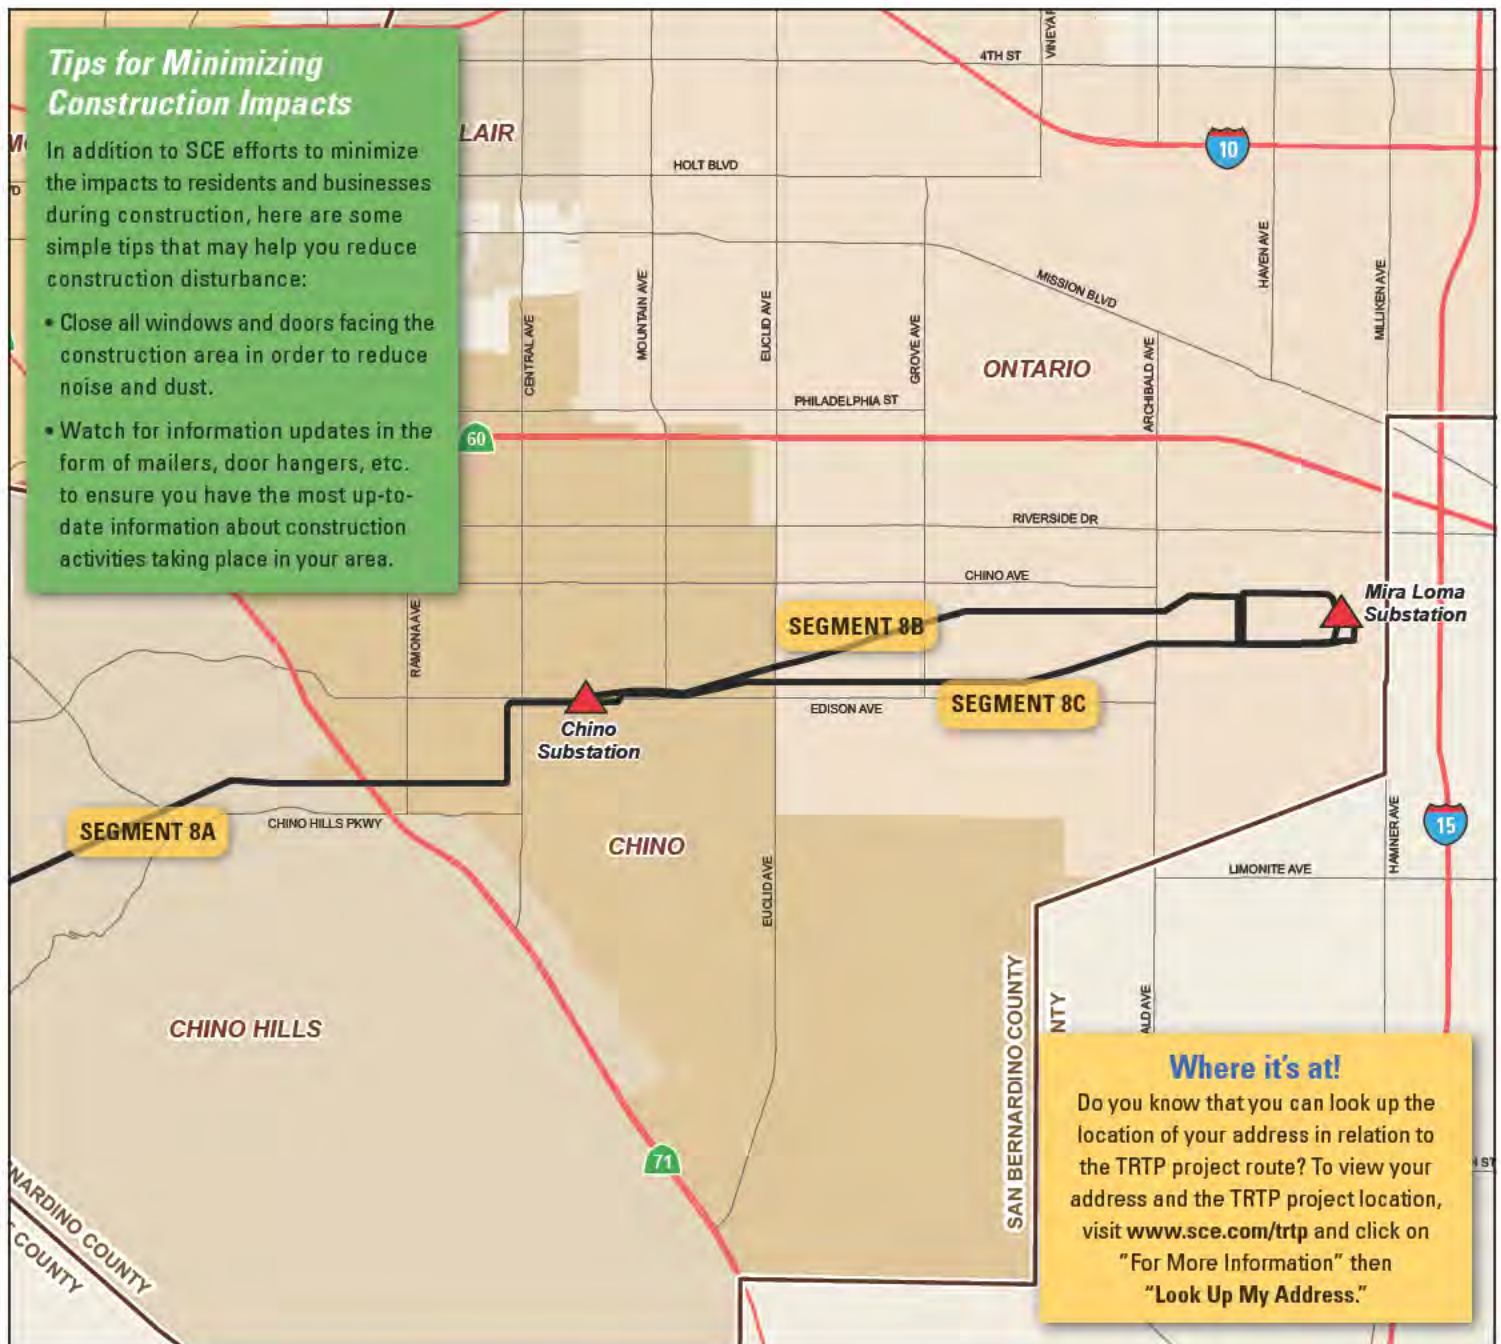

- **Removal of existing 66 kilovolt (kV) and 12 (kV) electrical distribution structures:** adjacent to Edison Ave, from west of Central Ave to east of Magnolia Ave in Chino
- **Lowering and installation of underground 66 kV, 12 kV distribution and telecom:** at various locations
- **Site restoration:** along the project route from east of Central Ave in Chino to the Mira Loma Substation in Ontario
- **Wire stringing activities with use of a small helicopter:** west of Central Ave to just west of the 71 Fwy in Chino; and, east of Tonner Canyon to the Western Transition Station in Chino Hills

TRTP 500kV Underground Project in Chino Hills and a Portion of Chino

- **Installation of underground 66 kilovolt (kV) subtransmission line:** clearing of vegetation and any impeding structures within the project area
- **Grading operations for access roads and pads,** requiring use of large construction equipment

- **Horizontal Directional Drilling,** from south of Prairieview Cir (west of Lost Trail Dr) to south of Garden Ct (west of Cork Dr)
- **Installation of new underground transmission infrastructure, including: wires, conduit (pipes), vaults, and related equipment** via conventional trenching throughout the underground project route
- **Installation of underground cable** will include the use of cranes, semi-trailers, temporary lane closures, and temporary parking restrictions throughout the underground project route
- **Installation of two transition stations** enabling wires to go from overhead towers to underground conduits; each station will be approximately three acres in size, enclosed by an 8-foot perimeter wall with some equipment approximately 133 feet in height
- **Use of large construction equipment, including cranes and project vehicles** throughout the project route
- **Periods of temporary lane closures and traffic** throughout the project route

*Please note construction schedule is tentative and may change depending on weather and other factors.
